

Meadowlark Audio
Handmade in the USA

Swift

Goose bump sonics,
trend setting style,
elegant, no nonsense engineering
and first rate parts and build quality
for just \$1195???

Yes.

Most speaker companies save the
good stuff for the top of their line.

But at Meadowlark Audio
we just LOVE the
challenge of making
affordable speakers that
are absolutely wonderful!

Swift is a true music lover's
speaker that will surprise
and delight you.

Swift embodies all of the principles of
design that has made Meadowlark the first
choice among music lovers.
By virtue of acoustically aligned drivers and

a simple first order crossover the Swift is a
time coherent speaker, it faithfully
reproduces the signal it is given without the
troublesome timing errors common among
other speaker designs. Our goal is that you
will enjoy the music as it was originally
played, without the effects of intervening
circuitry that alters the timing and adds
distortion. We build the Swift in the USA
from the finest materials including domestic
and imported hardwoods and real wood
veneers.

Dimensions: 7"W x 91/2"D x 36"H
(exclusive of base) Wt: 35lbs.ea.
